

Improving access to geothermal technology

A formalized partnership between GeoSmart Energy Inc. (GeoSmart) and ClimateCare, a Canadian HVAC co-operative, promises to improve access to leading edge geothermal technology in communities across Ontario.

"At a time when many homeowners and commercial enterprises are seeking more cost-effective, energy-efficient and environmentally friendly solutions to their heating and cooling needs, this new partnership will offer them ready access to viable energy alternatives to gas," says Mario Bernardi, executive director of ClimateCare.

GeoSmart will become the preferred geothermal heating and cooling supplier to ClimateCare's network of more than 30 independent residential HVAC professional contracting companies across Ontario.

GeoSmart is the largest non-manufacturing-based distributor of geothermal products in Canada. The company hosts the GeoSmart Energy Academy for contractors to learn about

GeoSmart unveiled its newly designed geothermal units at a recent ClimateCare member training meeting in Ajax, Ont. From left, Stan Marco, GeoSmart CEO; Mel Little, ClimateCare, purchasing chair; Chad Brezynskie, GeoSmart vice-president of sales and marketing; and Mario Bernardi, ClimateCare, executive director.

products and proper installation.

The company's geothermal heating and cooling systems tap into the free and renewable energy stored in the earth. By simply moving heat energy to or from

the home and earth through a ground loop system, a geothermal unit achieves efficiency levels that ordinary gas furnaces or air conditioners are unable to reach.

Campbell and Baker merge

Campbell Manufacturing, Inc. of Bechtelsville, Pa., and Baker Manufacturing Company, LLC of Evansville, Wis., have merged.

The combination of Campbell Manufacturing and the Monitor Division of Baker Manufacturing will create the largest, most recognized prime manufacturer of water system accessory products for the residential and industrial markets in the industry.

Emery W. Davis, president of Campbell Manufacturing, LLC of the new combined company, says the management teams, personnel and manufacturing facilities will remain in place and will continue to offer all of the combined product lines to customers through existing channels. The company says its long-term plans include the goal of
